- **An unrivalled range** - feast your eyes on the industry's most extensive range of garden products, including natural stone, reconstituted stone, decorative aggregates, edging, walling and an array of features such as stepping stones and planters.
- **Ease of supply** - our products are available from a nationwide network of stockists.
- **Ideas and inspiration** - we don't just give you the products, we'll show you how to make the most of them with our unique Bradstone design tools.
- **Assured installation** - with Bradstone Assured, a hand-picked national network of approved installers, skilled and reliable craftsmen will carry out your work to the highest possible standards.

Whether it's through delivering the industry's most impressive range of products, providing you with the best landscaping solutions or simply by supplying the inspiration for your garden design, trust Bradstone to create exactly the garden or driveway you're looking for.

Bradstone design

Create a professional looking garden with the help of a professional

How would you like to be able draw upon the expertise and experience of one of the country's most respected professional garden designers?

Well, now you can.

Simply visit www.bradstone.com/getinspired

Here, you'll be able to access and download Bradstone design packs.

Created by the award winning garden designer, Paul Hervey-Brookes, each design plan gives you ideas on how to accessorise, which plants work best and how to use paving in creative and imaginative ways. In short, everything you need to get that professional design feel for your garden.

- Garden plans created by award winning designer
- Online inspiration for your garden and driveway
- Wide range of different designs and styles available
- A wealth of design hints, tips and ideas
- Planting plans to help you bring your garden to life
- Array of paving options and styles
- See pages 46-52 for a preview of Paul's work

Paving planner

See what your paving looks like laid - before it's laid!

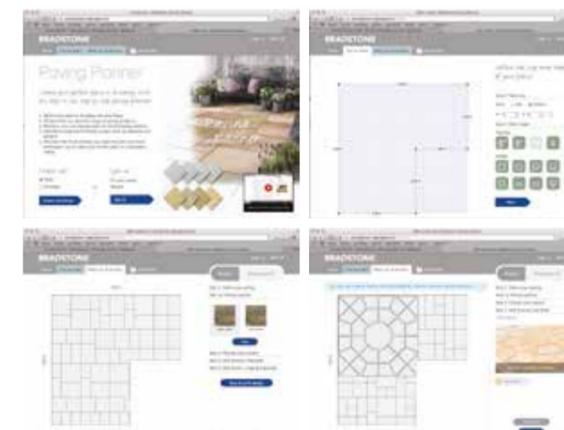

Wouldn't it be great if you could actually visualise your paving choice before you committed to buying? Or, if you could play a part in designing your garden?

Well, now you can. Thanks to our new online paving planner.

Simply draw your patio or driveway and then choose your Bradstone product. You can even add edgings and features.

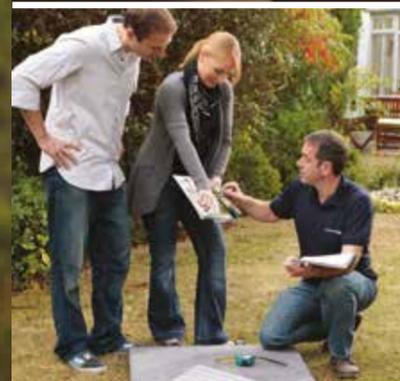

Once you've finished, the planner presents you with a laying pattern for your design and the quantities of product you need to order, and also provides a link to help you find your nearest Bradstone stockist and, if required, Bradstone Assured installer.

www.bradstone.com/paving-planner

BRADSTONE  **Assured™**

Putting you in touch with the professionals. Installers who make your garden dream a reality.

Thanks to Bradstone Assured, that's easy.

Enjoy complete peace of mind knowing your project is in the safest of hands.

To give you an idea of just what you can expect from our Assured installers, you'll see that we have included much of their work in this brochure.

Just look for the 'thumb' icon throughout this brochure. This indicates the projects that have been installed by Bradstone Assured installers.

Making the most of your outdoor space and laying a feature patio or driveway can represent a significant outlay.

So, you need to be sure you have the best people for the job. Proven professionals who'll carry out the work to the very highest standards.

In short, exactly the kind of installer you get from Bradstone Assured.

- 1 Find your perfect installer**
Simply visit www.bradstone.com/assured, enter your postcode, and we'll provide you with an Assured installer in your area.
- 2 How to choose an installer**
To help you make your final choice, simply take a look at each installer's ratings. All our installers have an individual profile where they have been rated by their previous customers. Choose the installers and then request a quote online. All contact details are in their profiles.
- 3 Work with your installer**
Make sure you work closely with your chosen installer and secure quotes for everything you need. Our Assured installers are extremely familiar with all Bradstone products and can be on hand to make suggestions and ensure you're never less than completely satisfied with your project.
- 4 Leave it to the professionals**
Once you've chosen the installer you want to work with and discussed the scope of the project, our advice is - sit back and relax!
All installers are hand-picked and approved by us, so you know you're getting skilled craftsmen who offer the best in professionalism and quality.
- 5 Enjoy your garden!**
Once all the hard work is done, all that's left to do is make the most of your wonderful new outdoor space.

www.bradstone.com/assured

Terms and conditions apply - see page 82.

Understanding the value of your project

Developing your patio or driveway isn't cheap. It's widely recognised that about 80% of the project cost is in the labour. The other 20% being the product. With this in mind, it's worth looking to get the best product you can for your budget. In this brochure we have labelled each of our products to help you make a quick comparison between what may be considered the premium or more budget products.

Look for the pound sign label. The more pound signs a product has, the more premium it is considered to be. **Ask your stockist for more information.**

Natural Porphyry

Beautiful natural stone paving you'll want to pore over

- Stunning Indian natural stone that combines the very best in aesthetic appeal with excellent durability
- Characterised by a distinctive range of colours and hues including purples, pinks and reds

Patio Deck™

"The new innovative and simple way to lay paving"

David Domoney
TV garden designer

Now with 2 kit options offering limitless paving possibilities

Patio Deck™ is a simple and effective DIY paving solution that allows you to lay a patio in hours whilst eliminating the need for messy, arduous and expensive groundwork.

Imagine being able to lay a new patio in just a matter of hours, rather than days. Well, now you can do just that with new Patio Deck.

With Patio Deck, the paving sits on a metal framework, thereby eliminating the need for most of the digging out, preparation and time-consuming labour normally associated with laying a patio.

Now available in 2 different frame sizes, Patio Deck allows you to choose from a huge range of Bradstone paving and is delivered to your home in a convenient kit, with full instructions on how to put your new patio together.

There's never been an easier or quicker way to create the perfect patio.

- Incredibly simple and effective
- Enables paving to be laid quickly and simply
- Eliminates the arduous task of digging out the foundations
- Allows you to carry on paving whatever the weather
- No mortar means no mess
- Lay 8m² of paving in just a couple of hours

Effortless installation. Laying Patio Deck™ is so easy

1

Clear the area, measure out where your patio is going to be laid and set the level.

2

Dig holes for the pads and feet and put the pads in place, ensuring they are level.

3

Place the frames onto the feet.

4

Adjust the feet to ensure that the frame is level and then fix the frames together.

5

Glue the frame to the feet and the skirt to the edge of the frame.

6

Now glue your paving to the frames.

7

If you are using 15.3m² random kit, use jointing compound to joint your paving.

8

Finished in hours and ready for dressing!

Patio Deck™

Delivering you a stunning patio in just a few hours

From the moment Patio Deck arrives at your door, it's all about convenience and simplicity. Everything you need is contained in the Patio Deck kit and the only real problem you might have is deciding which out of the stunning selection of Bradstone paving ranges you're going to choose - or settling on a shade, finish or shape for your new patio.

Visit www.bradstone.com/patideck to find out more about this innovative new system. See for yourself how easy it is to transform your garden.

For more Patio Deck options and design inspirations, please contact us on: 01335 372289.

There's a Patio Deck™ option for you. But how to decide?

There are 2 different Patio Deck systems offering myriad ways to lay the frames and create your patio. But, with 7 paving options providing many colour and laying variations, the best place to start is by choosing a paving that suits your style and taste.

1 Choose your paving

Your choice of paving determines which sized patio kit option you will require.

Option one: 8m² square kit

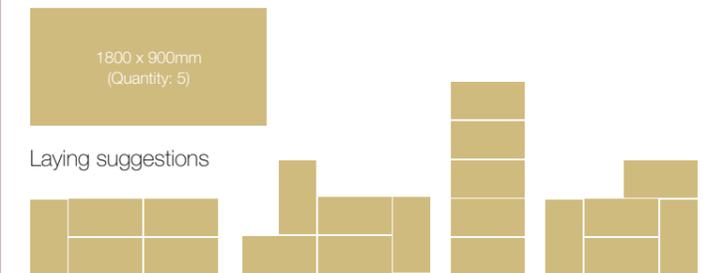

Panache paving is used for a contemporary square laid finish with no jointing.

- 1 Panache Textured (page 10)
- 2 Panache Ground (page 12)

2 Decide on your layout

The frames in Patio Deck can be laid in any configuration you choose. Here are a few examples:

The 8m² patio kit contains 1 frame size.

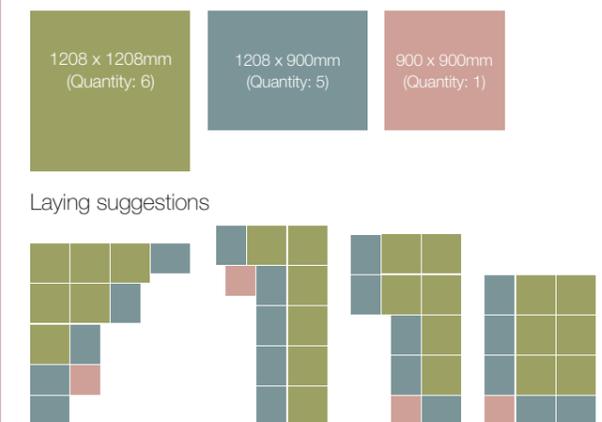

You can of course use more than one Patio Deck kit to create larger patios.

Option two: 15.3m² random kit

Various paving options, all laid randomly and jointed for a more traditional finish.

- 3 Old Riven (Page 36)
- 4 Natural Limestone (page 22)
- 5 Smooth Natural Sandstone (page 14)
- 6 Antique Natural Sandstone (page 31)
- 7 Natural Sandstone (page 32)

The 15.3m² patio kit contains 3 different sized frames.

What else is included in a Patio Deck™ kit?

Along with your chosen paving, this is what you can expect to receive when we deliver your Patio Deck kit.

Paul Hervey-Brookes

Award winning designer, Paul Hervey-Brookes

This design evokes the style and energy of the sun-kissed gardens of the 1970s in California. These gardens are rich in green textural planting and simple yet striking design details which draw on both nature and modern materials for inspiration.

In designing this garden, I wanted to draw on the glamour and style of the mid-century American garden, combining hard landscaping materials with rich planting to create year-round interest which has a contemporary feel.

An outdoor space that'll have you California dreamin'

Plants

Use a good mixture of heights to ensure you create a luscious green feel.

Create the feel... californian garden

PLANTING
Rich texture and beautiful planting offers the ultimate outdoor living experience.

PLANTING
Use bold splashes of colour with lots of evergreens to ensure interest all year round.

PAVING
Ventura Sandstone gives a contemporary feel whilst Stonewood sleepers offer a natural looking element as inspired by traditional Californian gardens.

STYLE
Achieve a Prairie style influenced garden within an urban context using Stonewood sleepers.

Paving
Rich textures and bold lines create a stunning backdrop to the perfect entertaining space.

Accessories

Choose bold furniture in fresh colours and mix with accessories which hint at an comfortable outdoor lifestyle.

Rockeries
Create areas of shape and interest using rockery stone and cobbles.

How we achieved this look...

- ✓ Ventura Sandstone paving in Silver Grey (p.17)
- ✓ Stonewood Sleepers in Antique Brown (p.74-75)
- ✓ Countrystone walling in Buff (p.71)
- ✓ Scottish Cobbles (p.77)

Paul Hervey-Brookes

Award winning designer, Paul Hervey-Brookes

The Gallery garden is cool and sophisticated - it's a grown-up place to entertain. The planting is subtle yet distinctive whilst hard landscaping details combine the whole scheme in an understated and elegant fashion.

In creating this garden, I've taken inspiration from the world of modern art and sculpture. The garden is designed as an open space that can be used for entertaining, outdoor cookery and relaxing with friends, perfectly complementing a design-led home.

Helping you to picture your perfect outdoor space

* Trees

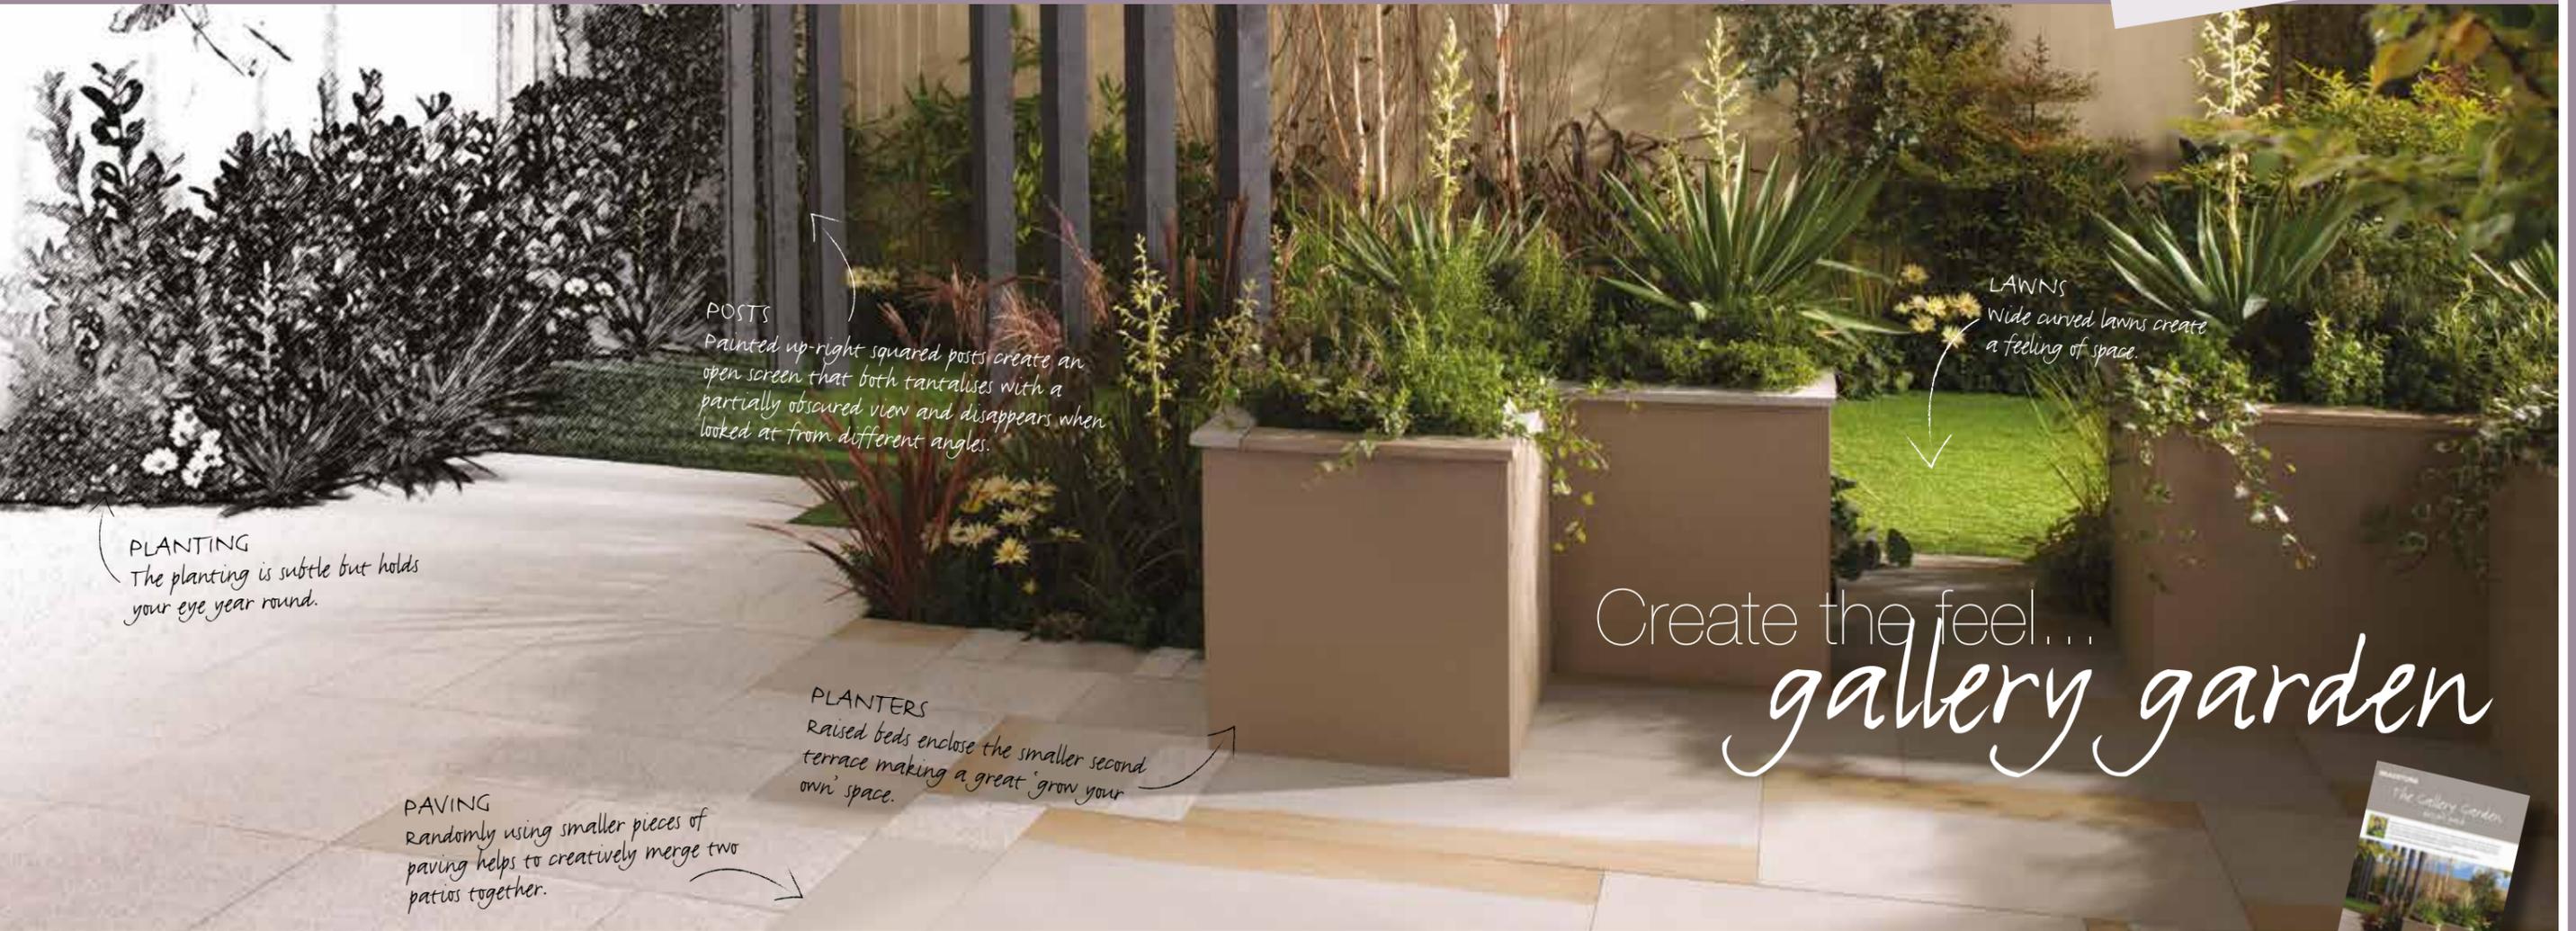

Clusters of trees provide green structure and a great backdrop.

* Paving

Keep it cool and sophisticated. Textures are really important like contrasting Natural Granite and Modena sandstone paving.

PLANTING
The planting is subtle but holds your eye year round.

POSTS
Painted up-right squared posts create an open screen that both tantalises with a partially obscured view and disappears when looked at from different angles.

LAWNS
Wide curved lawns create a feeling of space.

PLANTERS
Raised beds enclose the smaller second terrace making a great 'grow your own' space.

PAVING
Randomly using smaller pieces of paving helps to creatively merge two patios together.

Create the feel...
gallery garden

For Paul's design pack visit www.bradstone.com/getinspired

* Planting

The bulk of the planting is made up of evergreen shrubs. This creates waves of solid form providing year round interest and visual colour.

* Structures and sculptures

Seek out crisp 'designer' feeling structures and sculptures - stainless steel is a bold choice to create that modern feel.

How we achieved this look...

- ✓ Modena Sandstone in York (p.16)
- ✓ Natural Granite in Silver Grey (p.13)

Paul Hervey-Brookes

Award winning designer, Paul Hervey-Brookes

When I think of a secret place, it is always a space in which I can escape. A place removed from the hustle and bustle of everyday life in which I can relax, unwind and let my mind wander.

In creating the Secret Garden, I have revisited the Edwardian Arts and Crafts period - a style which almost typifies the Edwardian period and many of the great houses and gardens created during this time still influence garden design today.

Ssshhh... we have all the ingredients for your own private garden

* Planting

This garden is all about relaxing and tranquillity, so use colours such as lavender, purple, soft buttery yellow and green.

Create the feel... secret garden

EDGING
Use mortar in between the Tile on Edge joints to give a truly authentic feel.

PLANTING
Choose plants that give a year round interest. Cottage garden style planting helps keep it informal and relaxed.

PAVING
This garden proves that you can mix different styles and colours of paving to achieve a beautiful private sanctuary.

ACCESSORIES
Experiment with accessories to make it unique to you, your garden and your geographical surroundings.

For Paul's design pack visit www.bradstone.com/getinspired

* Furniture

Look for traditional shapes with generous curves and skirts to get the spirit of the period.

When combined, the paving creates depth and rich layers of detail that was typical of the Arts and Crafts movement.

* Paving

* Accessories

Choose classic accessories which have a nostalgic feel. When entertaining, use old china to continue the theme.

How we achieved this look...

- ✓ Old Town Chelsea Cobble paving in Weathered Limestone (p.23)
- ✓ Old Town paving in Weathered Limestone (p.26-27)
- ✓ Carpet Stones paving in Charcoal (p.38)
- ✓ Tile on Edge edging in Mellow Terracotta (p.68)

Paul Hervey-Brookes

Award winning designer, Paul Hervey-Brookes

This garden looks stylish all year round and is the perfect retreat to relax in with friends on long summer days. Contemporary with a quirky twist, this design is about standing out from the crowd and creating a bold personal space.

In creating the Boutique Garden, I was inspired by café culture and small individual hotel retreats. By using modern contemporary paving with reclaimed and natural materials, this garden has a truly designer feel.

A garden that's small, but beautifully put together

Blocks of evergreen planting soften the ribbons of stone.

Planting

Create the feel...
boutique garden

BESPOKE TOUCHES
Use bespoke sculptures or water features to break up the bulk of the walls.

WALLING
Walls help to create small areas of interest and can define a dynamic terrace in the centre of the garden.

COMPLEMENTARY PLANTING
Use subtle colours in the planting to really let the striking paving sing!

BOUQUETTE STYLE
This space combines modern and traditional with a difference using quirky elements.

Water features

Using paving in different ways or old, reclaimed materials can make for a really interesting water feature.

Paving

Combining modern and traditional gives a real quirky boutique feel.

Accessories

Give the garden some 'softer' forms by using rounded, sculptural accessories.

For Paul's design pack visit www.bradstone.com/getinspired

How we achieved this look...

- ✓ Antique Natural Sandstone in Cragstone (p.31)
- ✓ StoneMaster paving (p.09)
- ✓ Panache walling (p.70)
- ✓ Panache edging (coping and stepping stones) (p.68)
- ✓ Scottish Cobbles (p.77)
- ✓ Highland Pebbles (p.76)

Paul Hervey-Brookes

Award winning designer, Paul Hervey-Brookes

When it comes to initial first impressions, it could be argued that the front of your house, and in particular your driveway, is much more important than your back garden. A beautiful and stylish driveway sets the tone for your property,

so it's key to get the look just right and make the most of your kerb appeal. With Bradstone's array of block paving options, it's possible to choose something that is a perfect blend of aesthetic appeal and practicality.

You never get a second chance to make a first impression

* Pots

Don't skimp on the size of your pots or they may look lost.

* Paving

Herringbone or stretcher bond? Choose a laying style to suit your blocks and your home.

BORDERS
Strong borders with taller planting give great definition.

FLOWER BEDS
Sweeping flower beds soften edges and add colour.

KERBS
Kerb is kept low and sweeps up from the paving to soften the edges.

BLOCK PAVING
Choose blocks that complement your house style or colour.

PLANTER
Large planter with planting to match the flower beds.

Create the feel...
first impressions

* Planting

Keep planting as evergreen as possible but add touches of colour throughout to add interest.

Make a real difference

BEFORE
Remember: your driveway is the first thing people see when they visit your house

How we achieved this look...

- ✓ Driveflair in Brindle (p.62-63)
- ✓ Medium kerbs (for edging) (p.67)
- ✓ Large kerbs (for threshold) (p.67)

StoneMaster®

Mastering the look and feel of natural sandstone and granite

- Superbly realistic reconstituted stone block paving
- StoneMaster is equally at home on the patio or the driveway
- Available in three buff shades replicating natural sandstone and three grey shades in the style of natural granite. Supplied as a mixed pack containing four different sizes
- StoneMaster paving (page 09) provides a matching flag paving solution
- 💧 Pre-coated with Bradstone Surface Protection for easy removal of stains such as oil, grease and moss. The protection will last from 4-6 years

££££ Main image, 1 and 3: StoneMaster in Light Grey Washed, Mid Grey Washed and Dark Grey Washed

Bradstone Assured terms and conditions

Bradstone Assured members are subject to regular quality checks and assessments and are required to abide by the Bradstone Assured approved terms and conditions of membership at all times. Each Bradstone Assured approved member is directly responsible for the management of the relationship with their customers and any enquiries. Please note that the resulting legal contract is between you and the Bradstone Assured approved member, and is subject to the terms and conditions of that member. They will advise you of these conditions themselves. You should carefully review their terms and conditions applying to the purchase of your products and/or services. Claims or suggestions should be addressed directly to the relevant Bradstone Assured approved member providing the relevant products or services.

General information

Sizes and joint widths

- Size dimensions quoted within this brochure are nominal and for guidance only.
- Actual sizes will vary, particularly where riven profiles and fettled edges are a feature of the product.
- Always dry lay the product to check area required (especially circles and patio kits).
- See joint widths recommended for products on the product page.
- All m² coverage is approximate and may vary.

Health and safety

- Minor scuffing can occur due to movement in transit and will generally disappear in time.
- Due to the nature of our products we always recommend suitable lifting equipment be used.
- Always wear gloves and safety footwear when handling the product.
- Always wear safety goggles and appropriate respiratory protection when using cutting equipment.
- Ensure the products are on level ground and retained in some way before removing any packaging.
- Always handle with care as breakages and chipping may result from mishandling.
- If you require further health and safety guidance, please contact our customer care team on 01335 372289.

Cost

Bradstone regrets it is not able to quote recommended retail prices as those are set by its stockists and may be subject to variation. Please be aware that paving is just one element of the total cost and is rarely the largest outlay.

Block paving colour swatches

Colour variations can occur within packs, therefore:

- Ensure your sample and block are from the same factory.
- Block paving should be ordered from the same batch number to avoid colour variation.
- Do not mix blocks from different factories.
- Bradstone cannot accept responsibility once blocks are laid from different batches.
- Best results are achieved through mixing from 3 to 5 different packs and from vertical columns rather than horizontal rows.
- We recommend a neoprene faced or rubber sole plate on vibrating plate compactors to reduce scuffing.
- Light colours are susceptible to staining and care should be given when selecting blocks for driveways.

Natural stone colour and maintenance

- Natural stone products will have variations in colour and texture within single pieces and from piece to piece. We recommend a reasonable amount of product is viewed at your local stockist before ordering.
- Natural stone products may contain minor imperfections.
- Product should be mixed from a number of packs prior to installation.
- Always lay Natural Sandstone on a full mortar bed (except if laid on Bradstone Patio Deck).
- Smooth Natural Sandstone needs to be handled very carefully when installing to minimise staining. We would advise that the product be sealed prior to laying. However, if this is not possible, it should be covered up as it is installed and sealed as soon as it is laid.

Natural Sandstone

Silver Grey like all Natural Stone Sandstone products vary with differing geological conditions. Such variations can lead to small particles of ironstone within the product creating a darkening of the surface with natural weathering. Being pale in colouration, this natural weathering is more obvious with Silver Grey as against the other natural stones in the Bradstone range.

Other weathering

Weathering and site conditions can occasionally cause other variations in shade to appear. Differential weathering can cause patchy dark discolourations on the surface of individual units. Again this will generally diminish over time and will not affect long term performance. Natural stone may develop added marking, deposits or patches as mineral content oxidises. All products can develop algae and organic growths under certain environmental conditions and may require cleaning. Areas adjacent to borders, plant pots and trees may discolour from transfer of plant-life; specialist maintenance advice may need to be sought.

Aggregate Industries cannot accept responsibility for any of the above conditions. Should you require further advice in this specialist area call our Customer Care Team on 01335 372289.

Reconstituted stone colour

- Colours may vary subtly, especially in weathered shades.
- Colours will appear different during varying weather conditions such as sunlight and rain. Please check colour samples in dry conditions and in full daylight.
- Where possible, products should be selected from the same product batch.

- Occasionally dark and light patches may occur on the surface of the paving. This is due to differential weathering where the surface of the paving has cured at different rates.

- All decorative products will weather and change appearance over time.

Application/suitability

- Bradstone products and materials, unless otherwise stated, are for domestic landscaping projects.
- Decorative flag paving is not recommended for use on driveways.

- All products must be checked on arrival and in the unlikely event of products reaching you in a less than satisfactory condition, please refer to your stockist immediately, allowing time for the rejected product to be replaced.

- De-icing salts should not be used on the Bradstone range of decorative flag paving.
- Bradstone does not recommend the regular use of jet/power washers on the decorative range of paving and walling, as this may affect the surface of the product over time.

For advice on cleaning and general maintenance of your patio please contact the customer care team or refer to our website.

Efflorescence

Efflorescence appears on concrete paving products as white patches or a lightening of the surface colour, but seems to disappear when wet. It is formed by a normal chemical reaction between cement and water which causes calcium hydroxide (lime) to migrate through damp concrete to the paving surface and then react with carbon dioxide in the atmosphere resulting in a deposit of calcium carbonate crystals.

Efflorescence is very unpredictable in its occurrence but is more prevalent in winter when concrete becomes wet and dries more slowly. Although there are cleaners available, efflorescence is a natural phenomenon and will generally disappear with the natural weathering process and the passage of time.

Bradstone cannot accept responsibility for the effect of efflorescence which can be a characteristic of all good quality products with a high cement content. For more information visit www.bradstone.com

Order Choice

The Bradstone Order Choice service means that you can order virtually any product from any Bradstone stockist, even if they do not actually stock that particular product. You can also order the products in the exact quantities you require. Simply ask your stockist.
