## Preface

Since 1991, ADEZZ has manufactured planters, outdoor fireplaces and water features in its own manufacturing plant. In order to meet your customers needs best, we offer customised products, RAL-colours and a range of accessories including wheels for practically all our products. We specialise in manufacturing high-quality planters at a very competitive price. These sustainable Dutch quality products will certainly add value to your landscape design.

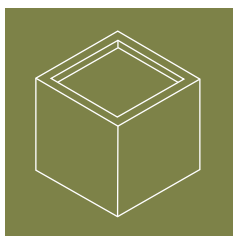

5 ADEZZ principles:

- Free delivery
- Buy on account, pay after delivery
  - 5 year warranty
  - Lowest price guarantee
- All standard products in stock, delivered within 1 week

## Corten Steel

The standard material thickness of our Corten Steel planters is 2mm, although they can also be produced in 3-4 and 5mm. Corten Steel, also known as weather resistant steel, is a very strong steel alloy. As soon as Corten Steel is exposed to the elements it will naturally weather and develop a protective layer of rust. This natural fixed coating of rust provides protection against further corrosion. Characteristic of Corten Steel is the brown-orange rust colour and its longevity. Our Corten Steel products are delivered in an un-rusted state and the weathering process will take about 4-5 months to complete. Corten Steel planters are not recommended to be used in combination with overflow pipes.

As standard, these planters are equipped with 15mm high feet. The model 'Andes' is also available with 90mm legs.

4 mm

Feet  
90mm

### Galvanised Steel

Hot-dip galvanisation is a production process of galvanising. This process involves providing the metal with a layer of zinc by immersing the product in a bath of molten zinc of about 460° Celsius. The usually dull grey material protects the metal from corrosion caused by weather influences.

## Aluminum

These planters are made of 3mm thick aluminum as standard, although they can also be produced in 4-5mm. Aluminum is light, strong, durable and resistant to corrosion. The top edge of all planters is reversed twice, which gives them a strong and timeless appearance. All Aluminum planters are equipped with 15mm high feet, so the planter is raised slightly off the ground. Once constructed the planters are powder coated with a strong adhesive primer and finished with a coloured coating.

Standard colours are RAL 7021 | 7035 | 9010. Almost all other RAL colours are possible (beware of start-up costs)

## Plant Frames

by GROENR

We have developed these Plant Frames to accentuate your border, protect your plants and realise clean lines in your garden. Because of the open structure of the frame it does not dominate and gives peace to the defined flowerbed. Lush planting is given a framework and will be better reflected. Available in Corten steel (3mm) and Aluminum (4mm).

Standard colours for Aluminum are RAL 7021 | 7035 | 9010. Almost all other RAL colours are possible (beware of start-up costs)

## Hardwood

These high quality planters are made from tropical hardwood that is legally harvested. This ensures that they are environmentally sustainable and they provide a warm and natural appearance. We only use hardwood with durability class 2. Due to the high durability of the wood no further treatment is required. If the planters are not treated they will gradually age, which has no influence on the quality of the planters. They are constructed using stainless steel fasteners, the inside is wrapped with EPDM and the bottom with anti-root fabric. We offer our Sevilla model in bespoke dimensions.

## Fibreglass

Our fibreglass planters are manufactured in high-quality reinforced fibreglass, with additional reinforcement in the corners. The standard colour used is black/grey **RAL 7021**. Also available in **RAL colours: 7006 | 7016 | 7035 | 9005 | 9010** (surcharge 10%). The quality of all our fibreglass planters is enhanced by the colouring, which runs through the entire material. The upper edge has been reversed twice, which gives this planter a splendid timeless appearance. We recommend that the planter should be cleaned at least twice a year. Please note that some cleaners may damage or affect the material, The best product for cleaning and maintaining fibreglass is the care-set that we offer on the accessories page. Do not clean with steel wool, sand paper, solvents or any other abrasive materials, cleaning with a pressure washer can also cause damage.

## ORGAN Fibreglass

Fantastic beautiful organic, natural forms that stand out both solitary or as in a group. Planters that are no longer subordinate to the planting but are an important part of the entire composition.

The top edge is reversed twice and follows the contours of the planters.

Standard produced in black/grey **RAL 7021**, (high gloss **RAL 9010**). Other available **RAL colours: 7006 | 7016 | 7035 | 9005 | 9010** (10% surcharge).

These planters are made of high quality Fibreglass which is coloured throughout the entire material.

We advise to clean and maintain the planters twice a year. Therefor we have a professional cleaning and care product available.

5 year warranty

## Fibreglass glossy

Our fibreglass planters are manufactured in high-quality reinforced fibreglass, with additional reinforcement in the corners. The standard colour used **RAL 9010**. Also available in **RAL colours: 7021 | 7006 | 7016 | 7035 | 9005** (surcharge 10%). The quality of all our fiberglass planters is enhanced by the colouring, which runs through the entire material. The upper edge has been reversed twice, which gives this planter a splendid timeless appearance. We recommend that the planter is cleaned at least twice a year. Please note that some cleaners may damage or affect the material, The best product for cleaning and maintaining fiberglass is the care-set that we offer on the accessories page. Do not clean with steel wool, sand paper, solvents or any other abrasive materials, cleaning with a pressure washer can also cause damage.

## Polymer Concrete

Polymer Concrete is a moulded stone composite, which is ideal for use in public spaces. The material is highly compressed, making it extremely strong. The composite is made out of natural minerals mixed with binding agents, which are becoming increasingly recyclable. The planters are not submitted to wear and tear. They are 100% watertight and are therefore extremely frost resistant. The closed structure of the material means that it does not hold dirt and will naturally clean from rainwater.

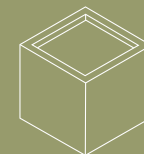

### Advantages:

- Very high compressive strength and bending-resistance, many times higher than fibre reinforced concrete
- 100% watertight and therefore frost-proof
- Durable material, not submitted to wear and tear
- Natural mineral such as quartz, basalt and granite mixed with synthetic resin
- Compact structure, which prevents dirt from attaching; a proper downpour will clean the product
- 5 year warranty

## FORNO<sup>o</sup>

FORNO® is the new product to prepare a healthy meal outside.

The spherical fire bowl has a round wide, thick flat roasting plate that you use as Teppanyaki or plancha.

The roasting plate has different cooking temperatures. The centre of the plate is warmer than the outer sides so cooking is even easier and all ingredients can be served together.

The FORNO® is beautifully designed and creates a special atmospheric cooking experience together with your guests. Whether you are baking eggs, slowly cooking vegetables, grilling a tender steak or preparing a fish meal, with the FORNO® you discover a completely new world full of possibilities for outdoor cooking. You can grill and bake at the same time thanks to the included BBQ grill.

- Upper ring made from 10mm Carbon Steel that serves as a plancha / Teppanyaki (1000mm diameter)
- Fire is controllable by air button
- Adjustable solid legs for every surface
- Including undercarriage
- Choice of 7 different undercarriages
- Including FORNO® BBQ grill + holder
- 5 year warranty

## Burni fire elements

BURNI®'s complete collection is produced using 3mm thick Corten steel and all fireplaces are supplied with a provision for positioning a barbecue grill. At a small surcharge we can also treat our fire elements with a black heat-resistant varnish. All our products are offered with 5 year guarantee. Using your BURNI® wood burner: To light the fire we suggest using fire lighters, with small pieces of firewood placed on top. It is important to use small amounts of wood and to add larger wood when the fire is burning clearly. Ensure that the fire gets enough oxygen to keep burning. Please note that the outside of the fireplace can become extremely hot. All Corten steel products come as newly fabricated steel. It may take several weeks to achieve the rusty look once exposed to the elements. This rust process will take about 4-5 months.

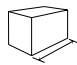

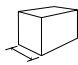

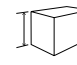

**Borr**

## BORR Outdoor fireplace

Sleek, unique industrial design with a timeless look. A fireplace that can be placed anywhere and will give outdoor life an extra dimension. This fireplace will radiate extra warmth for a longer time because of its height. This fireplace is a showpiece on your terrace. Inside Borr a BBQ grill can be placed, this feature offers you an extra culinary experience. Additionally a special stone can be placed on the grill, which enables you to bake pizzas as well.

Finished in 3mm Corten steel.  
5-year warranty.

## FORM Outdoor fireplace

by Aart van Asseldonk

While designing this outdoor fireplace I looked at the structures that are found in concrete formworks in industry and construction. The clean shapes that are connected by bolts and the construction outside the shape are directly derived from this technique. The coarse shape makes the Form an ultra sturdy fireplace which will become the visual centre of a garden or outdoor space. As time goes by, the Corten Steel will develop its special, dark rusty colour.

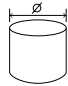

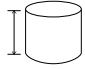

Form has been produced by ADEZZ, developer of timeless products.

## Water blocks

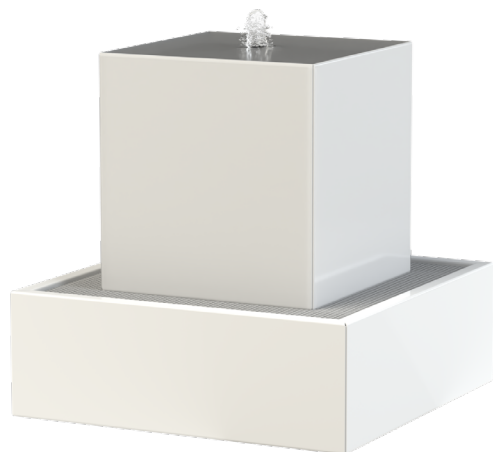

Unique Corten Steel or Aluminum water ornaments with a material thickness of 3 mm. We can produce almost any standard RAL-colour in Aluminum.

The water bubbles up from a stainless steel nozzle with LED lighting in the middle of the top plate. The water then runs evenly along the sides of the block into the underground reservoir and is subsequently pumped up again. Comes with pump, LED lighting and nozzle.

5 year warranty

new

## Walls Fibreglass

New to our range are the fibreglass walls. These are extremely rigid walls, which can be mounted to any surface using the mounting strip along the length of the base.

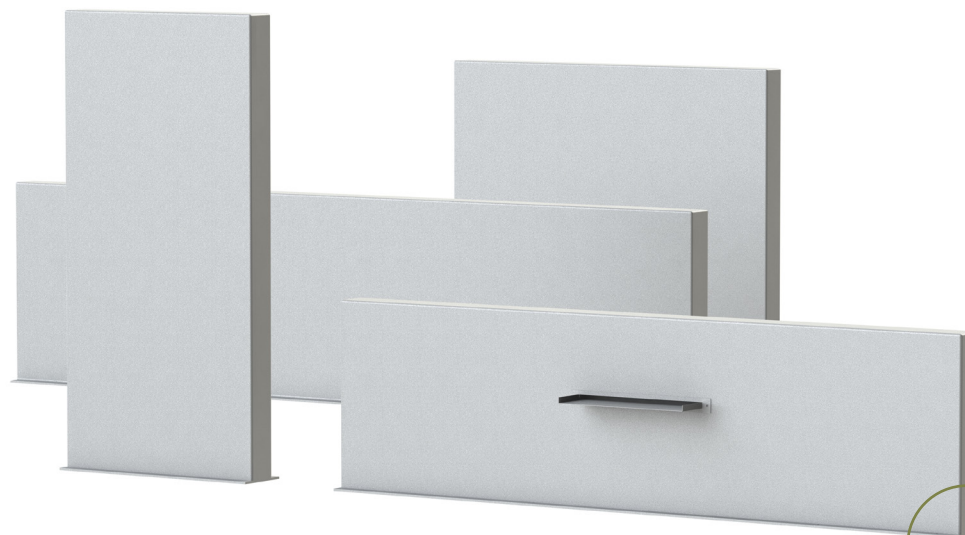

The advantage of our fibreglass walls is that they have a hollow structure, so you can simply add lighting etc.

Benefits fibreglass walls:

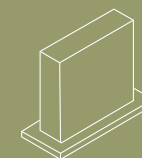

- Cheaper than comparable walls
- Light in weight
- Very rigid fiber reinforced material
- Easy to maintain
- The standard colour used is white **RAL 9010**. Also available in **RAL colours: 7021, 7035**
- Easy self assembly lighting

The cleaning solution must be carefully chosen to ensure that it does not scratch the planter. Do not clean with steel wool, sand paper, solvents or any other abrasive materials, cleaning with a pressure washer can also cause damage. We have put together a special cleaning product: "Cleaner + Protector kit".

## Walls Aluminum

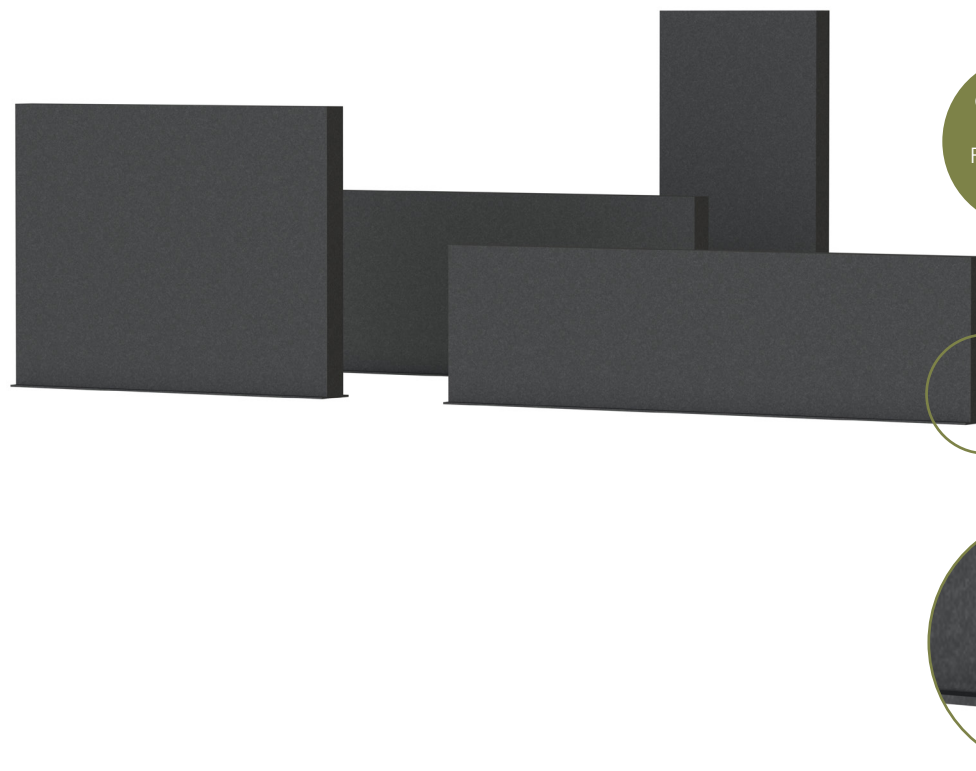

Aluminum walls are the perfect way to create a haven in your garden. It is possible to produce almost any size and they are available in almost all standard RAL colours. These are very rigid walls with a mounting strip on the base. To clean this product, we recommend "Aluminum cleaner", specially developed for cleaning of Aluminum, which is available from us.

Standard colours are **RAL 7021, 7035, 9010**. Almost all other standard RAL colours are possible (beware of start-up costs).

## Retaining walls

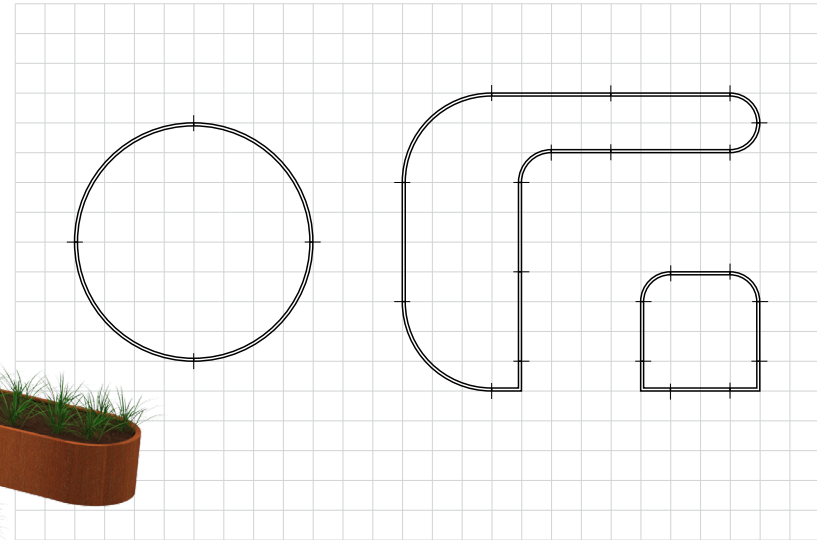

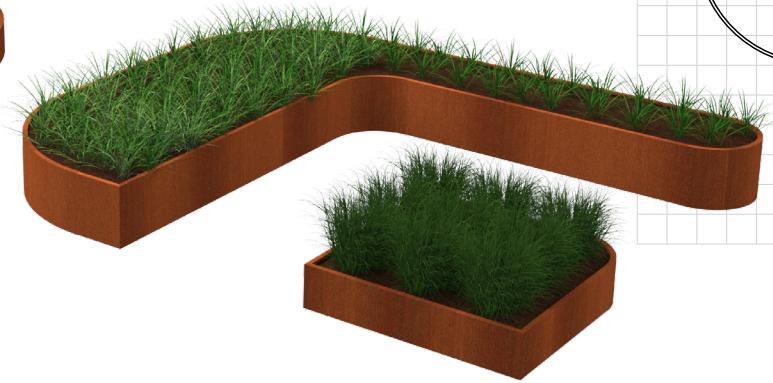

With our range of retaining walls you can endlessly combine and almost any shape can be realised easily and quickly in your garden design. A prefab system which is easy to install with the supplied fasteners. These retaining walls have a top edge of 50x25mm as standard.

Options:

- Available in 2 different materials: Corten Steel and coated aluminum
- Height: 200, 300, 400 and 600mm
- Straight pieces in length: 1000, 1500 and 2000mm
- Inside and outside corners, in lengths of 500 and 1000mm
- Inside and outside curves, with radius of 500 and 1000mm

Retaining walls are made to order therefore never in stock. Delivery time is 3 weeks.

5 year warranty
